ABOUT US

ARRAVAPULA SIDDHARTHA REDDY

Founder & Strategic Sourcing Director

Jatadhara Bio Ingredients Private Limited is an India-based strategic sourcing partner supplying high-purity bio ingredients to global pharmaceutical, nutraceutical, food, and cosmetic industries.

India holds a natural advantage in producing several high-value agricultural and botanical ingredients used worldwide in health, nutrition, and food applications. Jatadhara Bio Ingredients was established with a clear vision to bridge this natural resource advantage with the growing global demand for reliable, high-quality bio ingredients.

Our company operates as an integrated sourcing solution, connecting verified agricultural supply networks, qualified processing facilities, and international buyers through a controlled and transparent supply chain. Rather than functioning as a traditional trading intermediary, Jatadhara Bio Ingredients coordinates sourcing, processing, quality verification, and export supply to ensure that international manufacturers receive ingredients that meet their technical and regulatory requirements.

Our sourcing network includes agricultural producers, organic farmer groups, and specialized processing partners across India. Through this model, we are able to supply both raw agricultural bio staples and value-added botanical ingredients with consistent quality and traceability.

By combining agricultural sourcing expertise with production coordination and export management, Jatadhara Bio Ingredients enables international manufacturers to source essential natural ingredients from India through a single trusted partner.

VISION

Our vision is to evolve as a globally trusted sourcing partner for high-purity bio ingredients originating from India.

We aim to create a reliable supply bridge between India's agricultural biodiversity and the global pharmaceutical, nutraceutical, food, and cosmetic industries by delivering ingredients that meet international standards of quality, purity, and traceability.

Jatadhara Bio Ingredients is committed to developing long-term partnerships with global manufacturers, distributors and wholesalers by providing dependable sourcing, transparent supply chains, and consistent ingredient quality.

MISSION

Our mission is to build a reliable India-to-global sourcing platform for bio ingredients by:

- Establishing strong sourcing networks with agricultural producers and farmer groups
- Coordinating ingredient processing with qualified manufacturing partners
- Ensuring strict quality verification and compliance with global standards
- Providing dependable export supply and logistics management
- Supporting international buyers with transparent and efficient sourcing solutions

Through these efforts, we aim to simplify global procurement of natural bio ingredients while strengthening the international presence of high-quality Indian agricultural products.

- Transparent supply chain management

BOTANICAL POWDERS

LAKADONG TURMERIC

BOTANICAL POWDERS: THE LAKADONG ADVANTAGE The Lakadong stency Advantage ban "While the global market focuses on 'Organic' as a lifestyle label, Jatadhara Bio Ingredients focuses on Nutraceutical Potency. Standard organic turmeric often only contains 2-3% curcumin. Our Lakadong variety-naturally grown without chemicals-delivers a Guaranteed 7.5%-9% Curcumin content. For a manufacturer, this means you achieve the same therapeutic strength using only one-third of the volume, drastically reducing your raw material and shipping costs."

BOTANICAL EXTRACTS

BACOPA EXTRACT

MORINGA SEED
EXTRACT

ASHWAGANDHA
EXTRACT

Premium Herbal Extracts: Bacopa, Moringa Seed,
Ashwagandha for Natural Wellness.
